SUPER NEW TALON

ANIMAL CATCHER

The Ideal System For:

- Capturing feral animals.
- Bringing canines under control.
- Capturing wildlife.
- Providing long range capture of skittish animals.
- Allowing long reach capture of moving prey.
- Humane containment of one or more animals.

Hard to miss — 50 foot range and
16 foot diameter net — traveling at 22 ft. per second!

*Twice the Speed,
Twice the Range —
Rechargeable, Reloadable*

**SPECIAL
OFFER!**
**Only \$1,495
for the entire kit.**

Each kit contains a compressed air launching handle, 4 preloaded and refillable net heads, 20 compressed air cartridges, spare parts and accessories for multiple rapid launches. All packed in a sturdy, metal container with impact foam insert.

ANIMAL CONTROL

Unique Grappling System

Each net is equipped with a series of steel grapples that lock the net around the animal to be captured making it virtually impossible for it to shake off the net or run far.

The extend reach and high power projection of the net from the launcher makes it possible to catch the fastest animals "on the fly." It's no longer necessary to corner the prey and to stress the animal out in long chases.

In many cases the animal just "surrenders" to the covering net without fighting or entangling itself.
